DONNYBROOK STATION UPGRADE

We're making improvements to Donnybrook Station as part of the Shepparton Corridor Upgrade.

The upgrade will provide better station facilities for the community's growing population.

There will be more car parking, improved security and better access for people, buses and cars at Donnybrook Station.

Works will include:

- adding 150 new car parking spaces
- extending the length of the city-bound platform to fit all train carriages, making it quicker for passengers to get on and off
- new platform shelters
- two new bus bays in the station precinct, including shelters
- safer pedestrian crossings and pathways
- modifying Springs Road to improve vehicle access
- a drop-off zone and taxi spaces
- improving security with CCTV on platforms and in the car park, better station lighting and passenger information displays.

NEXT STEPS

We'll consult with local residents and passengers to get their feedback on the upgrade.

A Planning Scheme Amendment (PSA) will be required to allow the proposed new car park. We expect the PSA will be made public later this year.

A construction contract to deliver the work will be awarded later this year.

The project has a target completion date of 2020.

WHAT IS THE SHEPPARTON CORRIDOR UPGRADE?

The upgrade to Donnybrook Station will be delivered as part of the Shepparton Corridor Upgrade.

The project will also deliver more frequent services for Shepparton and will allow modern VLocity trains to travel to and from Shepparton for the first time.

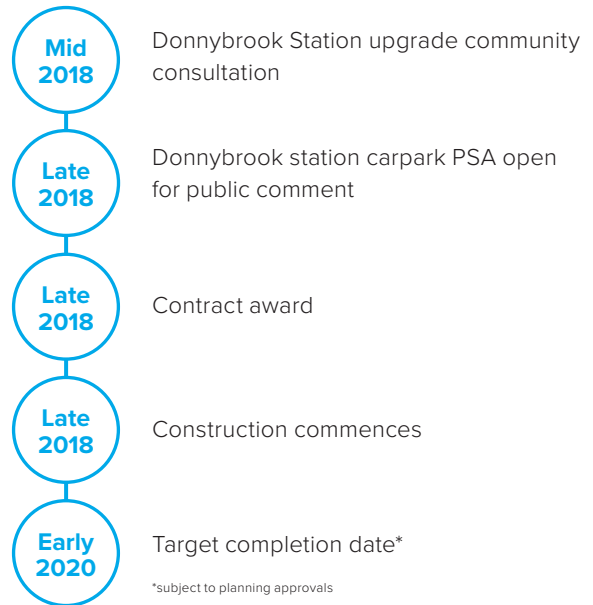

REGIONAL RAIL REVIVAL

The Shepparton Corridor Upgrade is funded by the Victorian Government. Delivery of the project will be overseen by Rail Projects Victoria as part of the Regional Rail Revival program.

Regional Rail Revival will create more than 1,000 jobs across the state.
