WHAT’S HAPPENING

Night works will take place from Monday 16 to Wednesday 18 September between 10:30pm and 4:00am, to complete platform extension works at Donnybrook Station.

The following work will take place on the platform and within the station precinct:

- Installation of 30 metres of conduit for communications on the platform
- Installation of myki cabling

WHAT TO BE AWARE OF

During night works, there will be some machinery and additional lighting in the rail corridor.

Access to private properties and businesses will be maintained at all times. No impacts to existing services or your property are expected from our works.

TRAFFIC IMPACTS

There will be no traffic impacts as a result of this work.
STATION ACCESS

Pedestrian, vehicle and cyclist access to the station precinct and car park will remain in place.

MINIMISING IMPACTS

There will be some noise from construction-related activities including minor excavation, backfilling of trench, landing asphalt and vehicle movements.

Where possible, we will minimise disruption to residents and businesses in the following ways:

- Scheduling noisy works during normal working hours or at the commencement of nightshift where possible
- Using noise-reduced equipment

We will notify residents and businesses if there are any significant changes to the works.

All planned works are dependent on suitable weather.

REGIONAL RAIL REVIVAL

Donnybrook Station is being upgraded as part of the $1.75 billion Regional Rail Revival. The program is a joint initiative of the Australian and Victorian governments and will upgrade stations, signalling and track across Victoria. The project is being delivered by Rail Projects Victoria on behalf of the Victorian Government.

Thank you for your patience while we upgrade Donnybrook Station.
